AUTHOR INDEX, VOLUME 47

Section	March	June	Sept.	Dec.
ACKNOWLEDGEMENTS	—	—	—	1645
THE BIOMETRIC SOCIETY	—	—	1209	1647
BOOK REVIEWS	345	781	1199	1631
CORRECTIONS	357	—	—	1641
CORRESPONDENCE	341	777	1193	1623

AALEN, O. O. Modelling the influence of risk factors on familial aggregation of disease 933
ABAKUKS, A. Book Review 790
ADDY, C. L. LONGINI, I. M., JR., and HABER, M. A generalized stochastic model for the analysis of infectious disease final size data 961
AFIFI, A. A. (see VOLLSET, S. E.) 1311
AGRESTI, A. Book review 346
AISBETT, C. W. (see McGILCHRIST, C. A.) 461
AKRITAS, M. G. and CLOGG, C. C. Tests of independence for bivariate data with random censoring: A contingency-table approach 1339
ALBERT, P. S. A two-state Markov mixture model for a time series of epileptic seizure counts 1371
ALBERT, P. S. (see ZEGER, S. L.) 1595
ALBERT, P. S. and BROWN, C. H. The design of a panel study under an alternating Poisson process assumption 921
ALEXANDER, N. (see BROWN, D.) 429
ALLEN, O. B. (see HUBBARD, D. J.) 419
ANDERSON, K. M. A nonproportional hazards Weibull accelerated failure time regression model 281
ARNASON, T. (see NORELL, L.) 205

BACCHETTI, P. and JEWELL, N. P. Nonparametric estimation of the incubation period of AIDS based on a prevalent cohort with unknown infection times 947
BAILEY, N. T. J. Book Reviews 348
BAILEY, R. A. Book Review 786
BAIRD, D. and MEAD, R. The empirical efficiency and validity of two neighbour models 1473
BAKER, S. G., FREEDMAN, L. S., and PARMAR, M. K. B. Using replicate observations in observer agreement studies with binary assessments 1327
BASFORD, K. E. (see FEDERER, W. T.) 1461
BEAL, S. L. Response to Reader Reaction: Confidence intervals and sample sizes 1597
BEAM, C. A. and WIEAND, H. S. A statistical method for the comparison of a discrete diagnostic test with several continuous diagnostic tests 907
BEGG, C. B. and PILOTE, L. A model for incorporating historical controls into a meta-analysis 899
BERKEY, C. S., LAIRD, N. M., VALADIAN, I., and GARDNER, J. Modelling adolescent blood pressure patterns and their prediction of adult pressures 1005
BEST, D. J. and RAYNER, J. C. W. Disease clustering in time 589
BINGHAM, C. and FIENBERG, S. E. Response to Reader Reaction: Testing hierarchical treatment components in analysis of covariance 1189
BJÖRNSSON, H. Book Review 1635
BOADI-BOATENG, F. (see JONES, R. H.) 161
BOOS, D. D. and BROWNIE, C. Mixture models for continuous data in dose–response studies when some animals are unaffected by treatment 1489
BRITTENHAM, G. M. (see McLAREN, C. E.) 607
BROOKS, R. J., JAMES, W. H., and GRAY, E. Modelling sub-binomial variation in the frequency of sex combinations in litters of pigs 403
BROSS, I. D. Correspondence 1194, 1626
BROWN, C. H. (see ALBERT, P. S.) 921
BROWN, D. and ALEXANDER, N. The analysis of the variance and covariance of products 429
BROWN, R. A. Book Review 785
BROWNIE, C. (see BOOS, D. D.) 1489
BRUNNER, E. A nonparametric estimator of the shift effect for repeated observations 1149
BUCKLAND, S. T. Book Review 353
BUCKLAND, S. T. and GARTHWAITE, P. H. Quantifying precision of mark–recapture estimates using the bootstrap and related methods 255
BURKHART, H. E. (see KNOEBEL, B. R.) 241

CALIŃSKI, T. and KRAJEWSKI, P. Book Review 1201
CAMPBELL, M. J. Book Review 347
CARTER, E. M. (see KIM, P. T.) 295
LE CESSIE, S. and VAN HOUWELINGEN, J. C. A goodness-of-fit test for binary regression models, based on smoothing methods 1267
CHEN, C.-H. and WANG, P. C. Diagnostic plots in Cox's regression model 841
CHEN, J. J. (see KODELL, R. L.) 139
CHEN, J. J., KODELL, R. L., HOWE, R. B., and GAYLOR, D. W. Analysis of trinomial responses from reproductive and developmental toxicity experiments 1049
CHETWYND, A. G. (see DIGGLE, P. J.) 1155

CHEUNG, S. H. and HOLLAND, B. Extension of Dunnett's multiple comparison procedure to the case of several groups 21
CHOI, S. C. and PEPPLE, P. A. Response to Reader Reaction: Predictive probability in clinical trials 330
CHOW, S.-C. and SHAO, J. Estimating drug shelf-life with random batches 1071
CLAYTON, D. G. A Monte Carlo method for Bayesian inference in frailty models 467
CLOGG, C. C. (see AKRITAS, M. G.) 1339
COOK, J. A. and LAWLESS, J. F. Two-sample tests with multinomial or grouped failure time data 445
COOK, R. J. (see WALTER, S. D.) 795
CORMACK, R. M. Book Review 790
CORSTEN, L. C. A. (see STEIN, A.) 575
CRAGER, M. R. and REITMAN, M. A. Running average analysis of clinical trial ambulatory blood pressure data 129

ZIMMERMAN, D. L. and HARVILLE, D. A. A random field approach to modeling forest diameter distributions at two points in time 241

SUBJECT INDEX, VOLUME 47

Accelerated failure time model 281, 289
Accident proneness 467
Acquired immunodeficiency syndrome 947
Activity pattern 1547
Adaptive sampling 1103
Adaptive test 975
Added variable 841
Added variable plot 1135
Aerial survey 1089
Agricultural experiments 1435
Alternating Poisson process 921
Ambulatory blood pressure 129
Analysis of covariance 523, 763, 1059, 1183
Ancillary statistics 361
Anderson–Darling statistics 1557
Anemia 607
Animal abundance estimation 1103
Animal ecology 1505
Animal experiment 681
Animal movement 701
Antibody heterogeneity 1019
Aplastic anemia 53
Arbitrary covariance 147
Assignment mechanism 1213
Association models 1339
Asymptotic power 445
Attributable risk 1247
Augmented partial residual plot 1135
Autoregressive model 1383
Autoregressive processes 813
Average sample number 419

Bayes discriminant 741
Bayesian inference 323, 467, 1213
Bayesian methods 1235, 1597
Beta–binomial 1049
Beta–binomial model 1257
Beta–geometric distribution 1423
Bias 899
Binary data 1267
Binary response 851
Binomial distribution 45
Biological data 147
Birth weight curves 883
Bivariate normal 549
Bivariate survival data 1339
Blood pressure 1005
Bootstrap 255, 757, 1089, 1547
Bootstrap methods 101
Bootstrap resampling 269
Border 1461
Breast cancer 987
Brownian motion 1117

Calibration 563, 1573
Cancer prevention trials 975
Cancer screening trials 975
Canonical moments 77
Capture experiment 725
Capture–recapture experiment 623, 1081
Carcinogenic risk 669
Carcinogenicity bioassay 681
Case–cohort design 63
Case–control studies 87, 497, 1247, 1257, 1563
Categorical data 33, 535, 1327
Causal inference 1213
Cause of death 669
Censored survival data 281
Censoring 117
Change-in-ratio 1531
Chi-square goodness of fit 751
Choice-based sampling 497
Circadian activity pattern 1547
Classification of pigs 13
Clinical trial design 745
Clinical trials 129, 289, 323, 511, 523, 763, 871, 1383, 1399
Closed test procedure 511
Cluster randomization 383
Cluster sampling 33, 1103
Clustered population 269
Clustering 1155
Cohort study 851, 1563
Cokriging 575
Collapsibility 1171
Colorectal cancer 987
Combination of 2×2 tables 373
Comparisons with a control 21, 45
Competition 1461
Components of Pearson's X^2 589
Components of variance 303
Compound symmetry 1383
Computer 1183
Concomitant variable 13
Conditional coverage rate 1573
Conditional independence 1171
Conditional logistic regression 487
Conditional maximum likelihood (CML) 497
Conditional prediction 147
Conditional sample space 1311
Conditionality principle 361
Confidence bound 1071
Confidence intervals 45, 255, 1311, 1597
Confounding 1355
Constructed variable 841
Contraception 1423
Contrasts 1461
Coronary heart disease 933
Correlation 825
Counting processes 101, 117, 467
Covariance 429, 825
Covariance function 575
Covariate measurement error 851
Coverage 1311
Cross-covariance function 575
Crossing hazards 101
Cross-validation 1

Dall's porpoise 701
Data augmentation 1297
Density estimation 1089
Design-stage measure 659
Detection 987
Deterministic timecourse modelling 1019
Diagnostics 1135
Digit preference 1423
Dirichlet–trinomial 1049
Discrete Mantel–Haenszel test 445
Discrete uniform distribution 589
Disease state models 595
Distribution-free estimation 1519
Dose–response 139, 1019
Dose–response curves 1267
Double-sampling 13
Drug switching 1213
Dunnett within-group procedure 21

Ecological sampling 1103
Economic threshold density 419
ED_{01} study 681
Eigenvalue 1461
Eigenvector 1461
EM algorithm 607, 623, 883, 947, 987, 1327, 1371, 1489
Empirical Bayes 177
Empirical validity 1473
Epidemiologic methods 319, 1165, 1247
Epidemiology 535, 589, 851, 933, 1155, 1563
Episodic disease 921
Error model diagnostics 1449
Error rates 1171
Error ratio 383
Errors in variables 523, 549
Estimated fetal weight 637
Estimating equations 33, 825
Estimating function 1165
Estimation 535, 1547
Estimation after testing 1399
Event history analysis 467
Exact inference 1311
Exact unconditional test 361, 1399
Exchangeability 871
Expectation 429
Experimentwise error rate 511
Exponential family nonlinear model 1171
Extended prediction 147
Extra-binomial variation 383
Extra-Poisson variation 383
Extra-population infection 961
Extra-variation 33

Familial aggregation of disease 933
Fecundability 1423
Field experiments 1449
Field-plot experiments 223
Field trials 1461
Fieller's interval 1573
Final size data 961
Finite populations 195
First-difference model 1473
Fisher discriminant 741
Fixed effects 813
Fixed-width confidence intervals 733
Follow-up studies 1165
Foot and mouth disease 1019
Fourier series 269
Four-level factorials 1435
Frailty 461, 467
F-square 1461

Gaussian distribution 419
Gaussian quadrature 21
Generalized estimating equation 383
Generalized linear models 281
Genetic epidemiology 467
Geometric distribution 177
Gibbs sampling 467
Glasshouse experiments 1435
Goodness of fit 589, 757, 1267
Goodness-of-fit tests 1339
Graft versus host disease 101
Group sequential design 289
Group sequential trials 733
Grouped lifetime data 445
Growth curve 623, 1005, 1519
Growth curve classification 147
Growth curve models 637

Haplotype 53
Hazard functions 461
Henderson's methods 303
